

Sequoia Hospital is Rebuilding

Spring 2010

Benefits to Our Community

The new Sequoia Hospital campus will be one of the most advanced health care facilities in the Bay Area. Features of the new 167 bed hospital campus include:

- Larger, private rooms – improved infection control for patient safety, enhanced patient care and comfort, with enough space for family to visit and stay overnight
- New consult rooms – better integration of care and communication between physicians, families and patients including portable medical records and advanced IT capabilities
- Healing environment – soothing natural interior colors, increased use of natural light, flooring designed for noise reduction
- Landscaping – new landscaping incorporating the existing trees and adding terraced front gardens and a water wall
- Green building – Reusing existing facility to save resources, converting $\frac{3}{4}$ acre of pavement to new landscaping, campus designed to accommodate future medical advances
- IT advances – wireless technology and paperless records, wireless collection of patient vital signs and integrated electronic systems for bedside point of care
