

# Sequoia Hospital is Rebuilding

## Healthy is... a new hospital! Pavillion Fact Sheet

The new Sequoia Hospital campus will be one of the most advanced health care facilities in the Bay Area. The existing hospital, including the Emergency Department and the Birth Center, is being remodeled, modernized and brought up to all state mandated seismic requirements of California SB 1953. The new Pavilion concrete structure is now half-way complete and the topping off celebrates the last structural concrete pour being placed within the new structure. The new Pavilion will deliver care in larger, private rooms with clinically advanced equipment. Overall, the new hospital campus is designed to meet the needs of future generations, carrying on a 60+ year tradition of providing award-winning care to the community.

### New Pavilion Highlights:

- Four-story Pavilion with 104 new beds. Total campus bed count will remain the same at 167.
- 148,000 square feet
- **Girdlestone Family Lobby** on the Garden level
- Award-winning Heart and Vascular Institute
- Women's Integrated Health at Sequoia
- State-of-the-art complete medical and surgical services
- Three floors of larger, home-like private patient rooms
- Advanced technology including Hybrid Cath Lab and Hybrid OR
- Terraced landscaping with fountain and rooftop healing garden

### Pavillion Floor Plan:

- Garden Level: 8 OR Suites including 1 Hybrid OR, 16 Recovery beds, 16 bed ICU
- First Floor: Cath Labs, **Burns Family Foundation Cardiac Special Procedures Area**, Pacemaker room, Electrophysiology Lab, Hybrid Cath Lab, 8 bed pre and post Staging Area, Cardiac Surveillance Unit (24 beds), Central Sterile Supply
- Second Floor: Cardiac Surveillance Unit (32 beds)
- Third Floor: Medical Surgical Unit (32 beds) including orthopedics, women's surgery, urology, and robotic surgery patients

## Benefits to our Community:

- **Larger, private rooms** – improved infection control for patient safety, enhanced patient care and comfort, with enough space for family to visit and stay overnight
- **New consult rooms** – better integration of care and communication between physicians, families and patients including ability to review medical records on bedside and wireless mobile devices
- **Healing environment** – soothing natural interior colors, increased use of natural light, flooring designed for noise reduction
- **Advanced medical technology** – Hybrid OR and Hybrid Cath lab allowing surgery and imaging to take place in one location without moving the patient
- **Landscaping** – new terraced front gardens and fountain, rooftop healing garden
- **Green features** – converting  $\frac{3}{4}$  acre of pavement to new landscaping, campus designed to accommodate future medical advances, energy saving systems and water management design in place
- **IT advances** – technology including free guest wireless access, paperless electronic medical records including electronic physician order entry and medication administration

## Pavilion Project Team:

- Catholic Healthcare West (CHW) Corporate Real Estate oversees the new Pavilion project
- Moon Mayoras Architects of San Diego, California designed the new Pavilion and Seismic Renovations
- Jacobs Engineering of Pasadena, California is serving as the project manager
- Hunt Construction of Phoenix, Arizona is the general contractor
